## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species: numerous combinations of substitutions constituting numerous GPA sequences. The species are independent or distinct because the claims are drawn to a combination of substitutions, constituting different GPA sequences. Each sequence corresponds to a single Group.

As provided in MPEP § 803.04, "Applicants will be required to select one combination for examination." The selected combination will be searched and examined. A combination may be as few as five substitutions, as permitted by claim 1, or as many substitutions as the combination of all the recited substitutions. Applicant is required to specifically indicate the single combination desired.

A combination of substitutions A-E, for example, is patentably distinct from a combination of substitutions F-J, as the searches required for each group are non-overlapping. Therefore, search of all possible combinations would constitute an undue search burden.

Should Applicant traverse on the grounds that the different combinations of substitutions are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of

Art Unit: 1646

the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other inventions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
